

COASTAL
HYDRAULICS

EXPERTISE. COMMITMENT. VALUE

ABOUT US

We M/s Coastal Hydraulics Pvt. Ltd. incorporated in the year 2004 as an SSI manufacturing hydraulic hose assemblies, located in the port city of Visakhapatnam and catering to the needs of the public and private sector industries in and around A.P. With more than 1.5 decades of experience in the line of trade, we have come a long way from being a small-time retailer of hydraulic hose assemblies to being one of the pioneers in AP for hydraulic hose assemblies. We are having an infrastructure set up spread over 4000Sq/ft tactically divided into office/workshop and; warehouse

We are one of a reputed firm meeting, the requirements Public, Private and Pharmaceuticals Industries, Factories located in and around A.P. We undertake to supply at a very competitive rate. We supply only genuine and quality materials with Prompt Delivery, as our motto is Customer's Satisfaction

A TRIAL ORDER placed on us will prove our efficiency in the Trade.

Mission statements - We strive to deliver the best customer service in the field of hydraulics, providing the best class solutions to our customer's queries.

We shall be highly obliged if you would like to include our name in your approved vendor list and favor us With your esteemed Enquiries and place your valued orders, which we assure you will be promptly attended to By us. Please reach out to us for the same.

Company policies - At Coastal Hydraulics Pvt. Ltd. our motto has always been to provide excellent quality and cost-effective products to our customers. We are committed to providing World Class Hydraulics and Pneumatics Solutions at the most competitive cost by continuous upgrading our manufacturing infrastructure through the latest technologies.

CUTTING

We follow a safety-oriented and precise cutting process with state of an art chop saw. This also ensures the employee safety as well as perfect cutting and end result.

MARKING

Position markings, fitting marks, line markings, or rows of dots reliably ensure fixed points in manufacturing processes

SKIVING

Skiving refers to removing (or shaving) part of the hydraulic hose cover and/or inner tube prior to attaching hose ends. With proper skiv machines we ensure it is shaved evenly.

ASSEMBLING

Using a sturdy vice and adding quality fittings to each hose ensures a high graded finish. This classic hand assembling technique makes the hose fitting sturdy.

CRIMPING

Crimping is the act of forming a metal sleeve or ferrule of the hose fitting with a surrounding series of die segments to compress the hose within the fitting

TESTING

Hydraulic testing consists of evaluating the behaviour of equipment under real conditions of use by applying hydraulic stresses: Mechanical resistance under high pressure (burst and proof pressure) Reaction to brief increases in pressure (water hammer effect) ... Resistance to hydraulic fatigue.
